Iris LIVE | *Your voice. Your data.*

Your sessions subtitled and translated live, in everyone's language.

Live subtitles on the room screen and on everyone's phone, in several languages. Everything runs on a laptop, even without Internet.

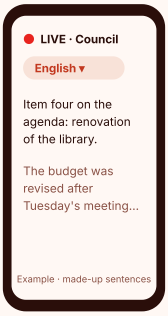

LIVE STAYS IN THE ROOM

Your data never leaves the PC, even live.

The voice is transcribed and translated on the laptop. The audience's phones only receive the text, over the room's network. Nothing is sent online.

WHAT THE AUDIENCE SEES

Their phone, their language

No app: scan the QR code, the browser is enough.

Everyone their language: several translations at the same time.

Readable: large text, speakers told apart.

STARTING A LIVE

Three steps, one minute

1. Choose the spoken language (or “Auto”) and the translation languages.
2. Show the QR code on the room screen.
3. Speak: subtitles appear live.

≈ 2 h 30 saved per session: the transcript and the minutes are ready as soon as the live session ends.

Indicative example: minutes of a 2-hour session written by hand in 3 h, versus 30 min of review with Iris.

WHAT MAKES THE DIFFERENCE

Several languages at once
Everyone chooses their own.

Language detected
Iris follows the speaker.

Room code
Only your audience sees the subtitles.

Speakers told apart
Named, with their consent.

Glossaries followed
Proper names and acronyms exact.

Accessibility
For people with hearing loss.

	IRIS LIVE	ONLINE SUBTITLING (IN GENERAL)
Where the voice goes	**Stays on the PC**	Sent to an online service
Without Internet connection	**Yes**	No
Cost	**Licence per computer**	Subscription or pay-per-use
