Iris | *Your voice. Your data.*

Every word, in every language, live. Without anything leaving your computer.

Live subtitles and translations on the room screen and on the audience's phones, then the minutes. Everything runs on a laptop, even without Internet.

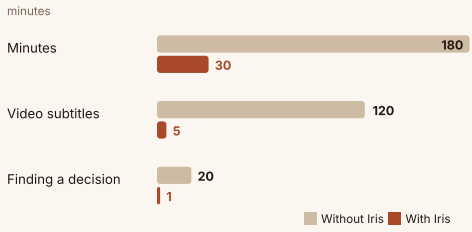

THE ESSENTIALS

Your data never leaves the PC.

Voices, texts, translations and minutes stay on the Iris computer, encrypted (AES-256). No online service. In isolated mode, no Internet connection at all: activation and updates by USB stick.

TIME SAVED

Per 2-hour session

OVER A YEAR

≈ 114 h
freed up for your teams

≈ 4 500 €
of working time saved

For a licence bought once, with no per-user subscription.

Indicative example: 24 two-hour sessions a year; estimated time without Iris: minutes 3 h, video subtitling 2 h, search 20 min; that is 4 h 44 saved per session, at €40 an hour (fully loaded cost). Assumptions to adapt.

WHAT MAKES THE DIFFERENCE

100% local and encrypted
No cloud, GDPR built in.

Works without Internet
Isolated mode for sensitive sites.

Multilingual subtitled LIVE
Room screen and phones via QR code.

Automatic minutes
Chapters, decisions, actions.

No compulsory subscription
Licence per computer, purchase or rental.

15 languages, 3 systems
Windows, macOS, Linux.

	IRIS	ONLINE TRANSCRIPTION SERVICES (IN GENERAL)
Where your recordings go	**Nowhere: they stay on your PC**	On the provider's servers
Without Internet connection	**Yes**	No
Cost	**Licence per computer**	Per-user or per-minute subscription

Request a demo.

Scan the QR code: a 30-minute demonstration, then a trial key to test on your own hardware. Quotes at iris-meetings.com.
